Bypass Inspection Fee.....	Back bill + \$170.00
Citizen Water Service Request – after hours	\$103.00
Landlord/Tenant Affidavit Filing Fee	\$265.00

Keep an eye on water consumption by monitoring your water meter located in the basement of your home. The meter has six digits and is read from left to right with the billing based on the first four digits from left to right. The furthestmost right digit represents 7.5 gallons (one cubic foot), the second from the right, 75 gallons and the third digit from the right, 750 gallons (one unit or 100 cubic feet). Consumption as shown on your water bill is measured in units of 100 cubic feet. Be alert for leaks in toilets, faucets, lawn sprinklers and water back-up sump pump systems that can result in high consumption water bills. **To help us better assist you, please have the current 6-digit read from the water meter in the basement when you call regarding any problem with your water bill.**

Final water bill procedures require the seller of the home to determine the date through which they are required to pay their bill: either the date of closing or when they turn the keys over, as listed in the purchase agreement of the house. Immediately prior to that date, the seller should read the six-digit number off the water meter (usually the meter is located in the basement of the house). Phone in the reading to water billing (586-446-2320), and a bill will be provided that can be picked-up and paid the next day or faxed to the title company/realtor handling the sale.

For your convenience, drop boxes are located along the circular drive near the Utica Road entrance to City Hall and in the Police Department Lobby (24 hours per day). Do not deposit cash in the drop box.

For electronic billing and automatic payment options go to www.sterling-heights.net/waterbill or call 586-446-2320.
